

Application details for power input:

**Power Thru balun
OR
Power Converter balun**

UTP cable, Cat5 or better, #24AWG typical

Power in

EXTERNAL POWER SUPPLY

Power comes from an external power supply. Wires are extended from the power supply to the CCTV panel, and these wires are connected into the green terminal blocks of the panel. Then, the power is transmitted to the camera via the UTP cable and Power Thru/Power Converter, which can transmit also video signals and PTZ data.
